IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions

To reduce the likelihood of a seizure when playing video games:

- 1. Sit or stand as far from the screen as possible.

- 3. Do not play if you are tired or need sleep.
- 4. Play in a well-lit room.
- 5. Take a 10 to 15 minute break every hour.

WARNING - Repetitive Motion Injuries

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.

- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.

INTRODUCTION

"Real magic." These words echo in Lara's head as she contemplates the majestic Swedish mountains above her.

Magic means supernatural, great power. It has existed throughout the ages, and has been described in countless legends in various cultures.

When Lara begins deciphering the forgotten Tome of Ezekiel, written by a mysterious medieval scholar, she is plunged into the legend's depths.

She sets off in search of the Black Stone that lies somewhere in the icy heart of what was called Wolf's Fang Peak by the scholar.

This Black Stone will reveal what Magic was, or still is.
